LICENSING & REVIEW

**l. All individuals reviewing this application are required under 35 USC 181 to sign and date this form regardless of whether they are making a secrecy order recommendation.**

**1. The attached copy of the application, any copies made therefrom and this form must be returned to the PTO once a recommendation not to impose secrecy has been made or a secrecy order has been rescinded.**

Pursuant to 35 U.S.C. 184, the subject matter of this application may be filed in a foreign country for the purpose of filing a patent application without a license any time after the expiration of 6 months from filing date unless the application becomes the subject of a secrecy order.

As the first analysis of a potential population of exoplanets from the *Kepler* satellite, we have identified a new class of exoplanets with delay in the migration of planets in a protoplanetary disk, and have shown that the delay is caused by the migration of the protoplanet from the disk to the protostar. The migration of the protoplanet is caused by the migration of the protoplanet from the disk to the protostar, and the migration of the protoplanet is caused by the migration of the protoplanet from the disk to the protostar.
